These Lakes Are Great

There are five Great Lakes. They are Lake Superior, Lake Michigan, Lake Huron, Lake Erie, and Lake Ontario. What makes them great? Read to find out!

The five Great Lakes are close together. They are the biggest group of freshwater lakes in the world. Rivers link the five Great Lakes. You can go in a ship from Lake Superior all the way to the ocean.

Long ago, people used the Great Lakes to get from place to place. They sailed across the lakes in boats. They built new towns by the lakes. Ships still take people from place to place across the lakes. Ships also carry wheat, coal, and flour. Ships take these things to places all over the world.

People have fun in the Great Lakes, too. Have you ever been to a lake? Did you swim? Did you fish? People go to the Great Lakes to do these things.

Here is an easy way to remember the names of the lakes.
